## Contact About Me

Etimesgut / Ankara 06796  
Turkey

Mobile no:  
+90 554 526 3130

My name is Okan. I have been living in Turkey since I was born. I have a great interest in computer since my childhood. I am a quick learner and I love learning new things. I am predisposed to teamwork. I am an active member of a few teams at the same time. I am striving to make the best in every situation.

## Education

2015- **Hacettepe University** Computer Science Expected Gradation, Summer 2020

2011-2015 **Gazi Anatolia Technical and Industrial Vocational High School** IT

## Experience

2019 Summer **JotForm** Ankara, Turkey  
*Intern*

I did an internship at JotForm for 30 days on web security. During the internship, I examined the web vulnerabilities in detail and increased my practical and theoretical knowledge on how to exploit them.

2019 Summer **HAVELSAN A.S.** Ankara, Turkey  
*Intern*

I did an internship at HAVELSAN A.S. on cybersecurity for 20 days. During the internship, I gained experience in penetration and reporting.

2018 Summer **BITES Defence and Aerospace** Ankara, Turkey  
*Intern*

I did my first summer internship on big data in BITES company. It last 30 days. I have gained experience with the current technologies used to acquire information. I improved my Java abilities.

2017- **Joined Courses**  
 ♦ Cyberio Hackingcamp'19. ♦ Akademik Bilisim'18 - "Network Security and Penetration Testing". ♦ Gazi University Cyber Camp'18. ♦ Hacktrick'17 and '18 - respectively "Python for Hackers" and "Web Security".

## Projects

2016-2019 **HUPROG**  
HUPROG(Hacettepe University Programming Contest) is competitive programming competition. We are the organizers of first the first and only programming contest of our university and we reached out top programmer students, encouraged them in competitive programming for 3 years. I was an organization leader of HUPROG'19. I was member of question-team of HUPROG'17-'18

2018 **SeeFood** Machine Learning Term Project  
Food Calories Estimation from given Images Project using machine learning methods. It is open source project. It is in my GitHub with more information.

May 2018 **ACMCTF**  
ACMCTF is ACM Hacettepe Capture The Flag contest. I wrote 2 question about social engineering for this contest.

2019 **Spor Cantam** Software Engineering Term Project  
This project is e-shopping android application. The app is same as Aliexpress, Amazon. I was an android developer. We used Kotlin in the android side. During the project, I improved my usage knowledge of git.

## Languages

♥ Turkish,  
Native Language  
♥ English,  
Upper-Intermediate

## Programming Languages

♥ Python  
C, JAVA

## Other Interests

Competitive Programming  
Cyber Security  
Machine-Deep Learning  
Arduino/Robotics  
Big Data

## GPA

3,23 out of 4

## Joined Offline Capture The Flag Finals

♦ STMCTF'18  
♦ TOBBCTF'18
